PROFILE SUMMARY

An enthusiastic Computer Science Engineering student and full-stack developer with hands-on experience building a multi-tenant SaaS restaurant management platform end-to-end. Completed a full-stack internship contributing to live product modules including inventory, kitchen display, and delivery management. Comfortable across Django, React/Next.js, and SQL, with a strong interest in AI tools and prompt engineering.

SKILLS

Languages: Python, Java, JavaScript, SQL

Frameworks & Libraries: Django, Django REST Framework, React, Next.js

Tools & Platforms: Git, VS Code, Figma, Claude AI

Databases: PostgreSQL, SQLite

Areas of Specialization: Full-Stack Development, Prompt Engineering, AI Tools

EXPERIENCE

Full-Stack Developer Intern - Pinesphere Solutions

May 2026

- Contributed to the backend for the Inventory module and the Kitchen Display module, tracking live order time, completion status, and order priority.
- Built backend logic for Online Ordering and Delivery Management, supporting end-to-end order flow from placement to fulfillment.
- Integrated frontend with backend APIs across multiple modules, ensuring data consistency between UI and server logic.
- Completed a 36-hour structured web development training program as part of the internship.

EDUCATION

Dr. N.G.P. Institute of Technology, Coimbatore

2024 - 2028

B.E./B.Tech, Computer Science Engineering (Anna University) - CGPA: 8.2 / 10

SRIPV Matric Higher Secondary School

HSC (12th Standard) - 89%

Vimal Jyothi Convent Matric Higher Secondary School

SSLC (10th Standard) - 93%

PROJECTS

Pinesphere POS / *Django, Next.js, PostgreSQL, Redis, Celery, Django Channels*

Multi-tenant SaaS restaurant management platform covering the full order-to-kitchen-to-delivery lifecycle.

- Built backend modules for Online Ordering, Delivery Management, Inventory, and the Kitchen Display System (KDS).
- Connected backend APIs with the Next.js frontend across all four modules for consistent real-time data flow.

CodeTutor AI / *Django, GPT-4o-mini*

AI-powered platform that helps new programmers understand and fix their coding mistakes.

- Built a tool that analyzes learner code, identifies mistakes, and explains the correct approach in plain language.
- Integrated GPT-4o-mini to generate beginner-friendly explanations and corrected code suggestions.

Client Project Tracker / *HTML, CSS, JavaScript, localStorage - Team Project*

A role-based web app that helps a company and its clients track project progress in one place.

- Built the Client module and Team Lead module, covering role-specific views and data flow.
- Implemented role-based routing across 5 user roles (Client, Admin, Project Manager, Team Lead, Member).

Student Complaint Management System / *Django, SQLite/PostgreSQL - Individual Project*

A web-based system that lets students file and track complaints digitally, replacing manual paper-based reporting.

- Designed and built the complete system independently, from database models to the student-facing complaint form.

CERTIFICATIONS & ACHIEVEMENTS

- Grand Finalist - Smart India Hackathon (SIH) 2025
- NPTEL - Cloud Computing (Completion Certificate)
- NPTEL - Internet of Things (Elite Rank, Completion Certificate)
- Python 3.4.3 Training - IIT Bombay (Remote)
- Generative AI Certification - Microsoft
- 36-Hour Web Development Training - Pinesphere Solutions
